

Hi my name is Anita Meyer. I am the author of a new book called: The Primordial Language - Confirmation of the Divine Creator. Today I am here to reveal and discuss how my book offers revolutionary new evidence for G-d's existence.

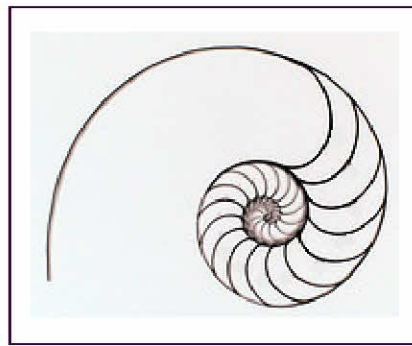

What I had discovered will soon shock you! I had discovered that there are mathematical units of growth in nature. We see these units of growth in all living things such as when the next branch or leaf on a tree will grow, or when a river branches off, or in the sprawling jagged edges of a lightning bolt. These patterns of growth are well-known in spirals such as are seen in the eye of a hurricane, tornadoes, all shells, the human fingerprints, DNA, the spirals in smoke rings, as well as milk in coffee or oil in water. All living things grow by a unit of expansion, spanning out from a point and increasing in growth. Some of these mathematical units you might be familiar with such as Pi 3.14, or the Fibonacci sequence which has a unit of growth that goes like this: 0,1,1,2,3,5,8,13,21,34,55,89,144,... (we add the last two numbers together to get the next number 233. Now its interesting when we take those last two numbers that I just mentioned (144 and 233)... and divide 144 by 233 it equals 0.618 (which happens to be the golden ratio/spiral). The Golden Section numbers are 0.61803 and 1.61803. We also have the Golden String is which goes like this: 101101011011010101... A sequence of 0's and 1's that is also closely related to the Fibonacci numbers and the Golden Section. We see these units of growth in Humans, animals, insects, plants as well as non living things like crystals. But these units of growth are found in all living and nonliving things down to the very core and life cycle of the atom itself. Now what is special about these units of growth is that they may very well be all different mathematical units of growth, but what is important to know is that they all work around the "Golden Mean Spiral", which is a microcosm (a miniature copy) of the spiral arms of our universe. In other words all these mathematical units grow around the Golden Spiral.

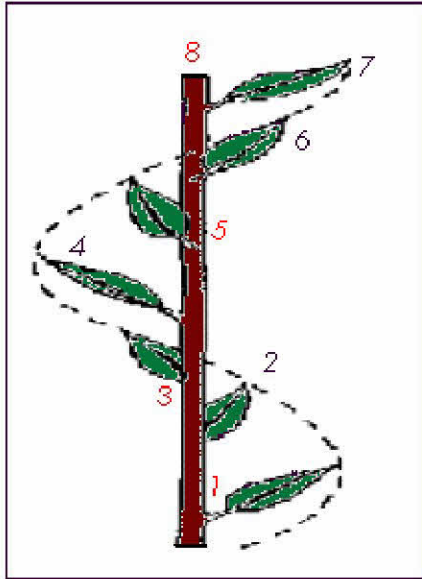

For instance when we look at this shell we can see that it opens out by a unit of growth that is similar to the spiral arms of our Universe:

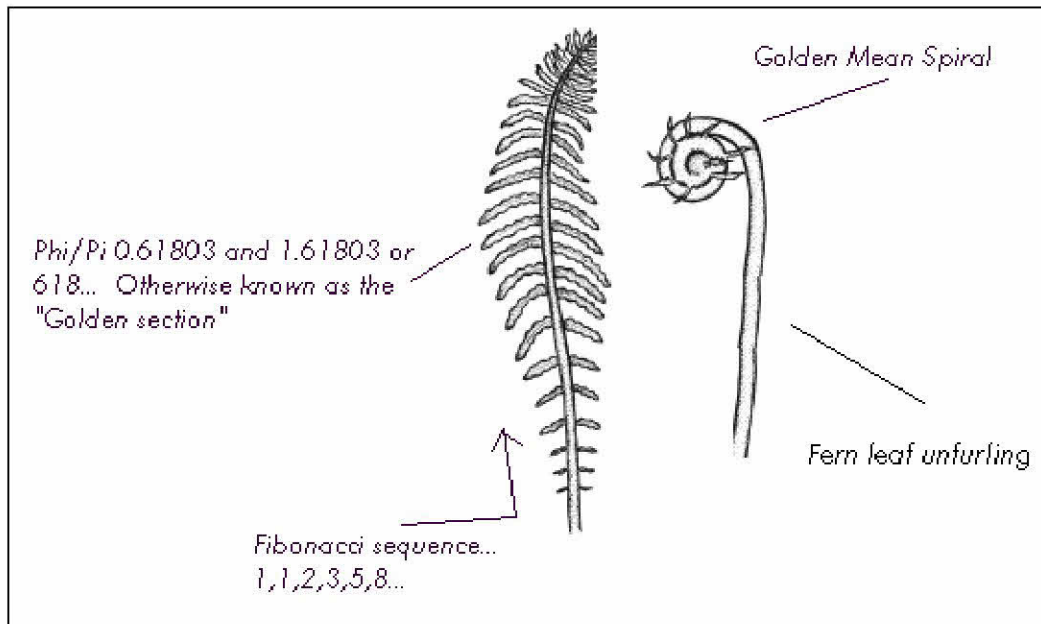

Here we can also see the same pattern:

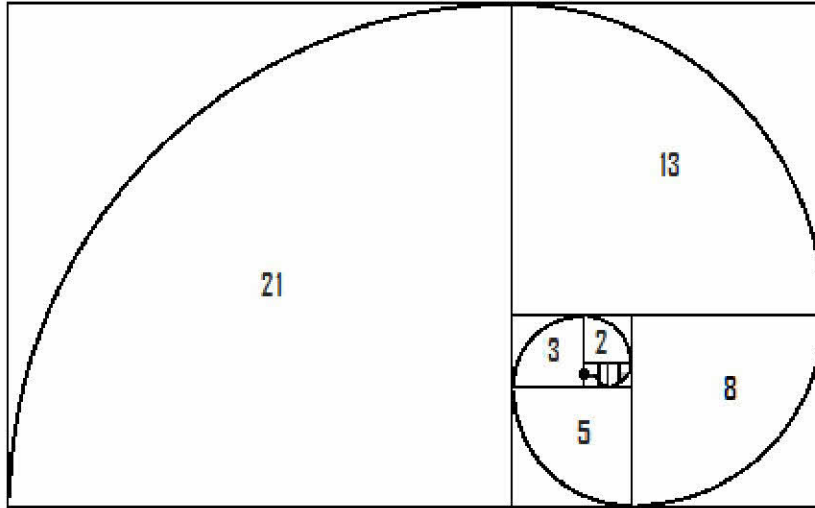

And here we can see that a plants leaves also spiral around the branch as they grow by the Fibonacci sequence.

We can also get a better idea in the picture below that shows how these different mathematical units play hand-in-hand with each other.

For a better understanding when you connect a curve through the corners of these concentric rectangles which illustrate the Fibonacci sequence, you have formed the golden spiral.

This would make sense seeing as we are living in a giant spiral, therefore everything that grows within is also infused by the spiral.

Realizing this, I wanted to link this connection to G-d. Its one thing to be visionary and at the same time credible. Therefore I started reminiscing through the Bible... I began to think, if there was one piece of tangible/material evidence that G-d has given us, that could be linked back to Him, what would that be? I immediately remembered the biblical story of when Moses was on Mount Sinai receiving the ten commandments from G-d... the story goes... G-d asked Moses to carve out two stone tablets and G-d would give Moses the new laws on them. It then came to mind that there had to be something even more special about these laws and that was that they were recorded in the Bible to have been written by the finger of G-d Himself. Exodus 31:18 describes this for us. **When the Lord finished speaking to Moses on Mount Sinai, he gave him the two tablets of the Testimony, the tablets of stone inscribed by the finger of G-d.** Additionally, Exodus 32:16 - **The tablets were the work of G-d; the writing was the writing of G-d, engraved on the tablets.** We read this again in Deuteronomy 9:10 - **The Lord gave me two stone tablets inscribed by the finger of G-d. On them were all the commandments the Lord proclaimed to you on the mountain out of the fire, on the day of the assembly.**

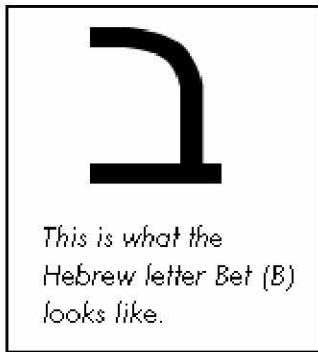

I soon began thinking that there had to be something special about this writing and especially the letters coming from the finger of G-d Himself. Of course we don't have the actual 10 commandments today or the writing on them, but we can rest assure that the Hebrew scholars had copied them down perfectly as they saw them throughout the centuries. This may be why there was so much emphases put on proper writing etiquette while writing the Torah. Continuing with this idea... I thought to myself there must be some rational logic or intelligent design to this writing and the letters especially if it was written by the creator of all things in existence.

So the first place I looked to make this amazing connection was my Bible (Hebrew Torah). I had turned to the very opening chapter of Genesis 1:1 that specifically tells us that in the beginning G-d created the Heaven and the Earth. I then fixed my eyes upon the very first Hebrew letter of the first word of Genesis 1:1 which is a Hebrew letter B (Bet) of the word Barashith (which means "beginning"). Now the Hebrew letter Bet has a individual symbolic meaning attached to it which represents - tent, house and enter. It's almost like an invitation to come in and dwell.

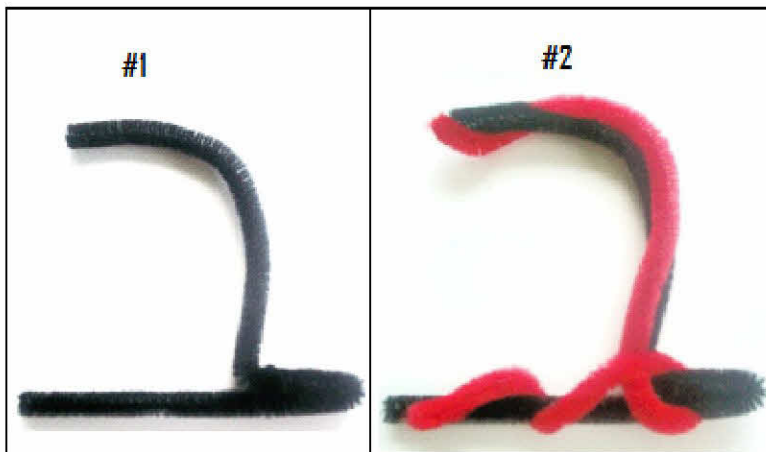

So what I did next was... I had taken this very letter (the form of it) and wrapped (or should I say spiraled) a bendable wire around it with the approximate measurements of unit growth that is found in nature which expands, furls out, or increases from a given point. Then I had removed the model form and was left with this spiral form (shown below). Now when I began to handle and look at this form, I caught sight of something unexpected... When I had turned this one model prototype form around in different directions such as upside down or backwards, or tilting it in at different angles I began to see that amazingly this "one

prototype form” that is formed from nature’s law, produces all the 22 letters of the Hebrew alphabet! There is no other alphabet in the entire world that does this - forms all its letters from “one prototype form“. I quickly realized what I had discovered was intelligent design, or rather should I say Divine Design!

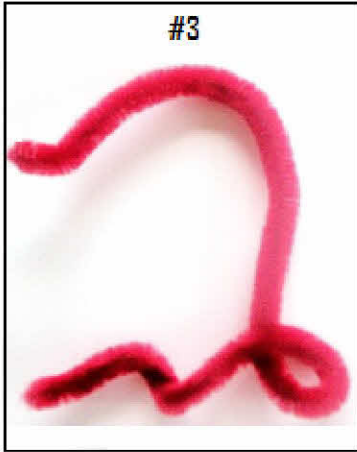

Below is a picture of what the Hebrew letter B (Bet) looks like. It is found at the very beginning of the Bible (Torah) in Genesis 1:1 in the Hebrew word Barashith (which means: In the beginning). What I am going to show you is clearly evidence of Divine Design that exposes the framework between nature and G-d so that one can visibly see the omnipotent hand at work. This also follows through in G-d’s word.

Take a bendable wire and spiral it around the shape of the Hebrew letter B (Bet).

We are left with this “one prototype form”:

Now when you take this “one prototype form” and turns it in different directions, for instance like upside down or sideways, one can begin to see that this particular form produces all the 22 Hebrew letters.

The complete Hebrew alphabet can be formed from this “one prototype form”. (If your interested in witnessing the full aspect of this, the forms to all the 22 Hebrew letters can be viewed in the book). Now if your also wondering why I spiraled the form with 3 distinct spirals, this is a further deduction of the first three letters of the very first word of the Bible/Torah (the Hebrew word Barashith again) of Genesis 1:1. These three letters are B (Bet), R (Resh), A (Aleph). The letter B is metaphorically figurative for the Hebrew word Ben which means Son, the letter R is metaphorically figurative for the Hebrew word Ruach which means Spirit and the letter A is metaphorically figurative for the Hebrew word Abba which means Father. So as one can see we have the Trinity in the very first three letters of Genesis 1:1 - G-d the Father, G-d the Son and G-d the Holy Spirit. G-d has a 3-part nature to Him and I though so should the spirals that wrap the Hebrew letter Bet, the very first letter of the Bible. Further, if one examines the Hebrew letters they will see that each and every one of the Hebrew letters has three part to it.

Now once one gets the initial perspective and understanding of this, and the implications of this discovery they can now look at the Bible with a whole new insight, awareness and appreciation. The book is based off of biblical scripture and venerates G-d in every aspect. One will not walk away from reading this book without having the knowledge that G-d (in all certainty) really does exist!

If you think this is amazing, you should read what else my book has to say. I also link the Hebrew letters (particularly the Hebrew letter Ayin) to the Great Pyramid of Giza.
